

INGESTION POINTS

EXPORT OPTION:

THE TECHNOLOGY

- Ephesoft Transact utilizes powerful algorithms to extract critical information from your physical and electronic documents
- It's a zero foot-print, browser-based application that runs on your servers behind your firewall
- Transact employs a lightweight Java workflow engine with minimal server overhead and utilization
- Powerful reporting modules offer advanced dashboards, system analysis and performance insight

Information Trapped in Unstructured Content

Ephesoft Transact is an intelligent document capture and data classification solution that extracts meaningful data from documents no matter the format or how you receive them. That data then feeds your back office applications and line of business processes to accelerate the pace of business transactions. Ephesoft Smart Capture® solutions can identify the information you need without manual data entry, without time consuming document sorting or scanning separator sheets with barcodes.

Offering what is fast becoming recognized as the most comprehensive Intelligent Document Recognition (IDR) software in the industry, Ephesoft enables businesses to better classify documents by content analysis, bar code or layout. The system can recognize and capture data using OCR and ICR engines, fixed formats, free form extraction or even fuzzy database logic.

- Windows, Linux, Cloud and Community Server Editions available.
- Mobile capture applications, Web Services API's and full application integration software development kits.

If you have paper or electronic documents that drive your sales orders, insurance claims, mortgages, invoices or any other business critical process, you need to investigate Smart Capture® solutions from Ephesoft.

EASY INTEGRATION

The only document capture and extraction system to employ RESTful APIs, making ERP, CRM, document management and other back office programs document capture enabled.

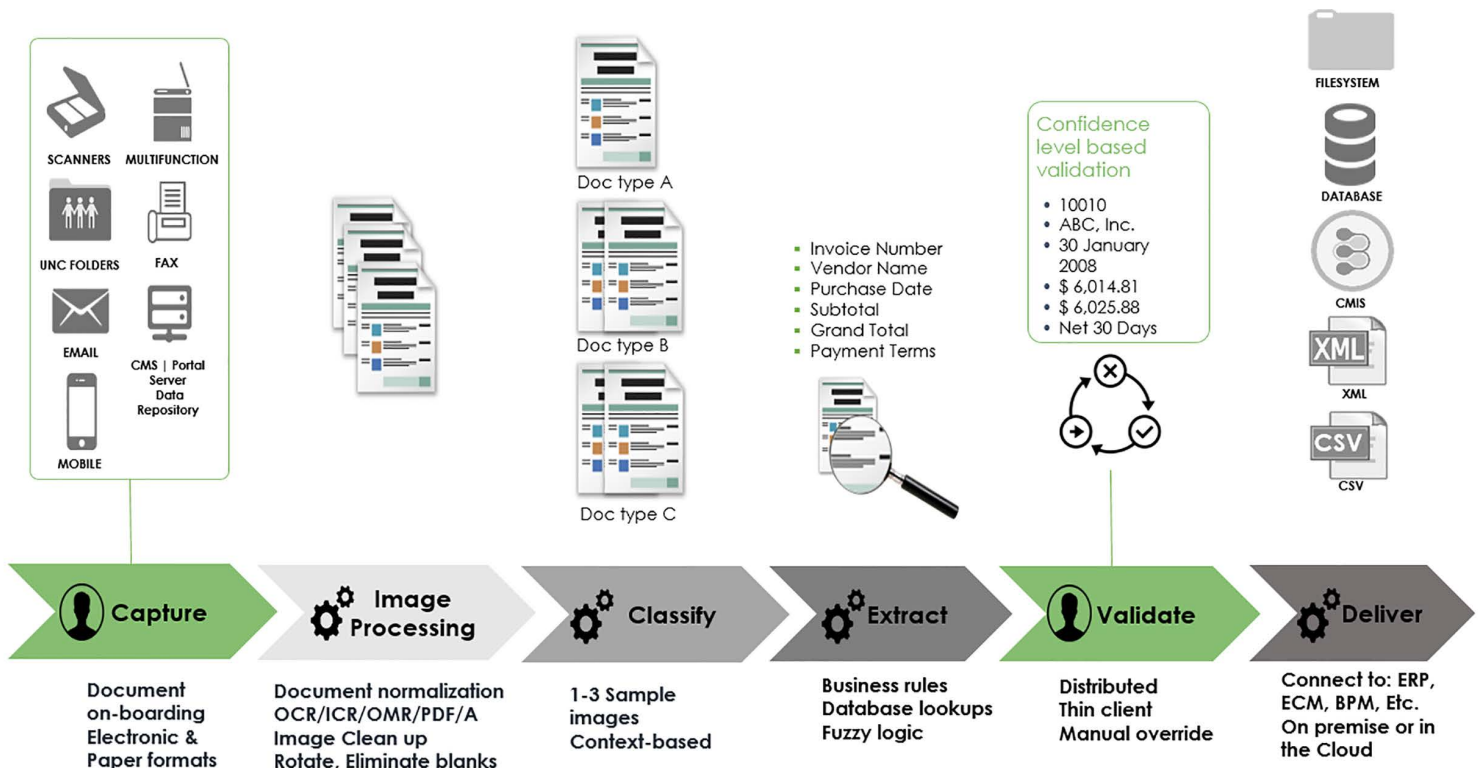

100% BROWSER BASED

A thin client architecture for Windows and Linux environments powers Ephesoft's fully customizable and scalable advanced capture platform, providing unlimited, uncapped document identification.

OUR TECHNOLOGY

Ephesoft's modern, open standards platform is superior to legacy server applications from IBM-Datacap, EMC-Captiva and Lexmark-Kofax, providing advanced capture solutions to multiple industries, helping save time, money and human resources.

DOCUMENT PROCESSING AUTOMATION

WHAT OUR CUSTOMERS ARE SAYING

"The Ephesoft cost structure has reduced our operating costs in ways we never thought possible. The related savings are enabling us to fundamentally change the economics of capturing information." VP of Operations - Financial Services Company
